

Sadia Rahman

Frontend Developer

Dhaka, Bangladesh

Email: sadia.rahman160920@gmail.com

Phone: +880 1700890040 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

OBJECTIVE

Frontend Developer specializing in React.js, building responsive and user-friendly web applications. Familiar with MERN stack fundamentals, Firebase authentication, and REST API integration.

SKILLS

Frontend: React.js, JavaScript, Tailwind CSS

Backend: Node.js, Express.js, MongoDB (NoSQL)

Auth & APIs: Firebase Auth, REST APIs, Axios, CORS

Tools: React Router, DaisyUI, Recharts, Git & GitHub

AI & Tools: DeepSeek, ChatGPT, GitHub Copilot, Prompt Engineering, AI-assisted Development

Soft Skills: Self-learner, Teamwork, Communication

PROJECTS

1. SecureExam — Online Examination System (Team Project) ([Live](#) | [GitHub](#))

- Developed Instructor Dashboard enabling batch management, exam creation, and end-to-end publishing workflow
- Built Student Exam System supporting MCQ and theory-based exams with automatic real-time result calculation and instant feedback
- Implemented gamified reward system (badges, points, leaderboards) and exam tracking to boost student engagement and retention
- Added security features including copy-paste prevention and tab-switching detection to maintain academic integrity during exams
- Integrated Stripe payment system with complete transaction tracking, allowing secure handling of exam fees and course payments
- Developed Admin Dashboard featuring real-time platform statistics, revenue charts, and user analytics for data-driven decision making

Tech: Next.js, MongoDB, NextAuth.js

2. PawMart — Pet Adoption & Supply Portal ([Live](#) | [Server](#) | [GitHub](#))

- Built a community-driven platform for pet adoption and pet supply sales with category filtering (Pets, Food, Accessories, Care)
- Implemented Firebase authentication (Email/Password + Google) with protected routes and user feedback
- Developed full CRUD functionality for pet/product listings with add, update, delete, and order management
- Enabled adoption/order requests, order history tracking, and PDF report download using jsPDF
- Built RESTful APIs using Node.js, Express.js, and MongoDB for listings, orders, and data handling

Tech: React.js, Tailwind CSS, Firebase Auth, Node.js, Express.js, MongoDB

3. HERO.IO — App Explore & Install ([Live](#) | [GitHub](#))

- Developed responsive app marketplace with dynamic listing and search filtering
- Implemented install/uninstall functionality using LocalStorage for client-side state management
- Created analytics dashboard using Recharts for review and usage visualization
- Added sorting, loading states, and error handling for improved UX
- Configured React Router for persistent navigation and deployment support

Tech: React, Router, Tailwind, Recharts

EDUCATION

B.Sc. in Computer Science & Engineering (CSE)

United International University (2019–2023)

LANGUAGE

- Bangla (Native)
- English (Professional Working Proficiency)
