OBJECTIVE

Frontend Developer specializing in React.js, building responsive and user-friendly web applications. Familiar with MERN stack fundamentals, Firebase authentication, and REST API integration.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, Tailwind CSS

Backend: Node.js, Express.js, MongoDB (NoSQL)

Auth & APIs: Firebase Auth, REST APIs, Axios, CORS

Tools: React Router, DaisyUI, Recharts, Git & GitHub

Soft Skills: Self-learner, Teamwork, Communication

PROJECTS

PawMart — Pet Adoption & Supply Portal (Live | Server | GitHub)

- Built a pet adoption & supply marketplace with category filtering and responsive UI
- Implemented Firebase authentication (Email/Password + Google Login)
- Developed listing management and ordering features using CRUD operations

Tech: React.js, Tailwind CSS, Firebase Auth, Node.js, Express.js, MongoDB

SecureExam — Online Examination System (Team Project) (Live | GitHub)

- Developed Instructor Dashboard for batch management, exam creation, and publishing workflow
- Built Student Exam System with MCQ & theory exams and real-time result calculation
- Implemented gamified reward system and exam tracking
- Added security features (copy-paste prevention & tab switching detection)
- Integrated Stripe payment system with transaction tracking

My Contributions:

- Developed Admin Dashboard with real-time statistics, revenue charts, and analytics
- Implemented recent activity tracking and user distribution insights

Tech: Next.js, MongoDB, NextAuth.js

EDUCATION

B.Sc. in Computer Science & Engineering (CSE)

United International University (2019–2023)

LANGUAGE

- Bangla (Native)
- English (Professional Working Proficiency)
